

**NAAN MUDHALVAN**  
**Salesforce Developer(Course)**  
**Assignment no 1**

Name : Sanjay S

Naan Mudhalvan id : au611220104128

Year & Dept : IV year & CSE

Batch : 2024

Zone : 8

**1. Creating a Master-Detail Relationship between two custom objects and setting up a Roll-Up Summary Field to calculate the total number of records in the child object is a common task in Salesforce. Below are the steps to achieve this:**

## Step 1: Create Custom Objects.

The screenshot shows the 'Custom Object Definition Edit' page for creating a new object named 'Parent'. The 'Label' field is set to 'Parent' and the 'Plural Label' field is set to 'Parents'. The 'Object Name' field is also set to 'Parent'. The 'Record Name' field is set to 'Parent Name' and the 'Data Type' is 'Text'. Other settings like Context-Sensitive Help Setting and Content Name are also visible.

The screenshot shows the 'Custom Object Definition Edit' page for creating a new object named 'Child'. The 'Label' field is set to 'Child' and the 'Plural Label' field is set to 'Children'. The 'Object Name' field is also set to 'Child'. The 'Record Name' field is set to 'Child Name' and the 'Data Type' is 'Text'. Other settings like Context-Sensitive Help Setting and Content Name are also visible.

## Step 2: Create a Master-Detail Relationship

1. Go to "Setup" in Salesforce.
2. In the Quick Find box, type "Objects" and select "Objects and Fields" > "Objects".
3. Click on "Parent" to edit it.
4. In the "Custom Fields & Relationships" section, click "New" under "Related To".
5. Choose "Master-Detail Relationship" as the data type.
6. In the "Related To" field, select "Child".
7. Configure other options as needed (e.g., setting the relationship name and whether it's required).
8. Save the changes.

The screenshot shows the Salesforce Object Manager interface for the 'Parent' object. The left sidebar lists various setup items like Page Layouts, Lightning Record Pages, etc. The main area displays the 'Fields & Relationships' section with four items listed:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)	✓	
Parent Name	Name	Text(80)	✓	▼

The screenshot shows the Salesforce Setup interface for creating a new custom field. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar under 'Fields & Relationships' has 'None Selected' selected. The main content area is titled 'Parent New Custom Field' and 'Step 1. Choose the field type'. It asks to specify the type of information the custom field will contain. The 'Data Type' section shows several options: 'None Selected' (selected), 'Auto Number', 'Formula', 'Roll-Up Summary' (with a note about it being read-only), 'Lookup Relationship', 'Master-Detail Relationship' (selected), and 'External Lookup Relationship'. Each option has a detailed description below it.

The screenshot shows the Salesforce Setup interface for creating a new relationship. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The left sidebar under 'Fields & Relationships' has 'None Selected' selected. The main content area is titled 'Parent New Relationship' and 'Step 2. Choose the related object'. It asks to select the other object to which this object is related. A dropdown menu labeled 'Related To' contains the value 'Child'. The top right corner indicates 'Step 2 of 6'.

**Fields & Relationships**

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Child Name	Name	Text(80)		✓
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
total child count	total_child_count_c	Roll-Up Summary (COUNT Parent)		✓

**Step 1. Choose the field type**

Specify the type of information that the custom field will contain.

**Data Type**

- None Selected Select one of the data types below.
- Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
- Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
  - The relationship field is required on all detail records.
  - The ownership and sharing of a detail record are determined by the master record.
  - When a user deletes the master record, all detail records are deleted.
  - You can create rollup summary fields on the master record to summarize the detail records.
- External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
- Checkbox Allows users to select a True (checked) or False (unchecked) value.
- Currency Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

## Step 3: Create a Roll-Up Summary Field

1. In the same "Parent" editing page, scroll down to the "Roll-Up Summary Fields" section.
2. Click "New Roll-Up Summary Field."

- 3. Choose the "Child" as the child object for which you want to calculate the total.**
- 4. Give your Roll-Up Summary Field a name (e.g., "Total\_Child\_Records\_\_c").**
- 5. Choose the type of calculation you want (e.g., "COUNT").**
- 6. Configure any additional filter criteria if needed.**
- 7. Save the changes.**

Action	Label	Tab Style	Description
Edit   Del	Brokers	People	
Edit   Del	Chilids	Lightning	
Edit   Del	Parents	Lightning	
Edit   Del	Properties	Real Estate Sign	

#### **Step 4: Update Page Layouts and Record Types (if necessary)**

**Depending on your use case, you may want to update page layouts and record types to make sure the new relationship and fields are displayed correctly to your users.**

## Step 5: Test the Relationship and Roll-Up Summary Field

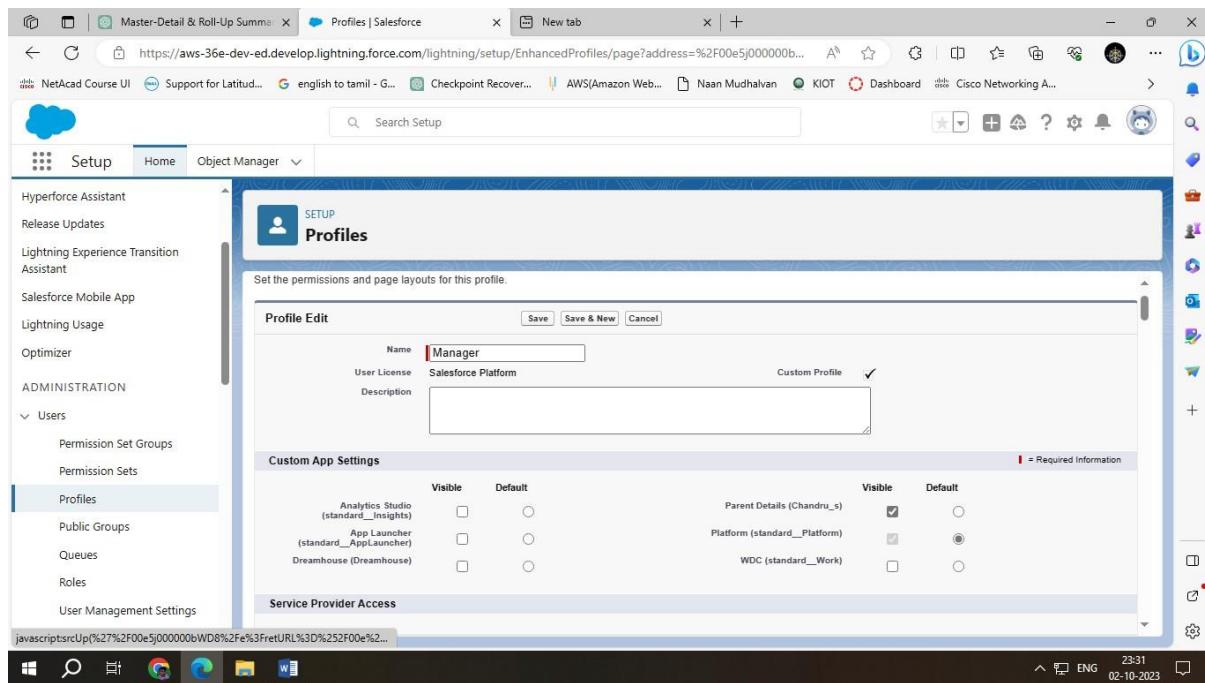

Create some records in both the Parent and Child objects and verify that the Roll-Up Summary Field correctly calculates the total number of related Child records on the Parent record.

That's it! You've successfully created a Master-Detail relationship between two custom objects (Parent and Child) and set up a Roll-Up Summary Field to calculate the total number of records in the Child object.

2. If there are 2 users, User A and User B in the organization and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

### Step 1: Create a Public Group

1. Go to "Setup" in Salesforce.
2. In the Quick Find box, type "Public Groups" and select it.
3. Click on "New Public Group."
4. Create a group for User A, let's call it "UserA\_Group," and add User A to this group.
5. Create another group for User B, let's call it "UserB\_Group," and add User B to this group.

The screenshot shows the Salesforce Setup interface with the following details:

- Left Sidebar:** Shows navigation categories like Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, Administration, Users, Permission Set Groups, Permission Sets, Profiles (selected), Public Groups, Queues, Roles, User Management Settings, and Users.
- Top Bar:** Includes a search bar labeled "Search Setup" and various setup icons.
- Current Page:** "SETUP Profiles".
- Content Area:**
  - Contact Point Emails:** A grid of checkboxes for Contact, Point, Email, and other objects.
  - User External Credentials:** A grid of checkboxes for various external credential types.
  - Custom Object Permissions:** Two tables for Brokers and Childs, showing permissions for Basic Access (Read, Create, Edit, Delete) and Data Administration (View All, Modify All).
  - Session Settings:** Set Session Times Out After to "2 hours of inactivity" and Session Security Level Required at Login to "--None--".
  - Password Policies:** Set User passwords expire in "90 days", Enforce password history to "3 passwords remembered", Minimum password length to "8", Password complexity requirement to "Must include alpha and numeric characters", Password question requirement to "Cannot contain password", Maximum invalid login attempts to "10", Lockout effective period to "15 minutes", Obscure secret answer for password resets, and Require a minimum 1 day password lifetime.

## Step 2: Create Criteria-Based Sharing Rules

For User A:1. Go to "Setup" in Salesforce.

2. In the Quick Find box, type "Sharing Rules" and select "Sharing Settings."
3. Under "Account Sharing Rules," click on "New Sharing Rule."
4. Create a rule that shares records owned by members of "UserB\_Group" with the "UserA\_Group."
5. Define the criteria based on which records should be shared (e.g., ownership).
6. Save the sharing rule.

The screenshot shows the Salesforce Setup interface under the 'Users' section. The user 'Sunil A' is selected. The 'User Detail' section displays various profile settings:

Name	Sunil A	Role
Alias	sa	User License
Email	2k20cse176@kiot.ac.in [Verify]	Profile
Username	2k21cse176@kiot.ac.in	Active
Nickname	User169631476178576A93816	Marketing User
Title		Offline User
Company	Male	Knowledge User
Department		Flow User
Division		Service Cloud User
Address	2/73 Kankandaipalayam Malasamudram 637503 Tamil Nadu India	Site.com Contributor User
Time Zone	(GMT+05:30) India Standard Time (Asia/Kolkata)	Site.com Publisher User
Locale	English (India)	WDC User
Language	English	Mobile Push Registrations
Delegated Approver		Data.com User Type
Manager		Accessibility Mode (Classic Only)
Receive Approval Request Emails	Only if I am an approver	Debug Mode
Experience ID		Ninth-Contract Palette on Charts

The screenshot shows the Salesforce Setup interface under the 'Profiles' section. A new profile 'Bmanager' is being created. The 'Profile Edit' screen includes fields for Name, User License, and Custom Profile, along with sections for Custom App Settings, Service Provider Access, Tab Settings, and Standard Tab Settings.

**Profile Edit**

Name	Bmanager	Custom Profile
User License	Salesforce Platform	<input checked="" type="checkbox"/>
Description		

**Custom App Settings**

Visible	Default	Visible	Default
<input type="checkbox"/>	<input checked="" type="radio"/>	<input checked="" type="checkbox"/>	<input type="radio"/>
<input type="checkbox"/>	<input checked="" type="radio"/>	<input checked="" type="checkbox"/>	<input type="radio"/>
<input type="checkbox"/>	<input checked="" type="radio"/>	<input checked="" type="checkbox"/>	<input type="radio"/>

**Service Provider Access**

**Tab Settings**

Overwrite users' personal tab customizations

Standard Tab Settings: Home Default On Learning Default On

The screenshot shows the Salesforce Setup interface with the following details:

- Left Sidebar:** Includes links for Home, Object Manager, and various Administration sections such as Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and User Management.
- Main Content Area:**
  - Profiles:** The current page title.
  - Contact Point Permissions:** A grid of checkboxes for Contacts, Push Topics, Sellers, Streaming Channels, and User External Credentials.
  - Custom Object Permissions:** A detailed section for Brokers, Childs, Parents, and Properties, with sub-sections for Basic Access, Create, Edit, Delete, View All, and Modify All.
  - Session Settings:** Set to 2 hours of inactivity and None security level.
  - Password Policies:** Set to expire in 90 days, enforce 3 remembered passwords, minimum length of 8, complex must include alpha and numeric characters, cannot contain password, and 10 maximum invalid login attempts.

### For User B:

1. Follow the same steps as above but create a separate sharing rule for User B.
2. This rule should share records owned by members of "UserA\_Group" with the "UserB\_Group."
3. Define the criteria based on which records should be shared.

#### 4. Save the sharing rule.

The screenshot shows the Salesforce Setup interface. On the left, the navigation sidebar is open, showing categories like Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, and Administration. Under Administration, the Users section is expanded, showing sub-options like Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Users. The 'Users' option under Administration is selected. The main content area is titled 'New User' and shows the 'User Edit' form. The 'General Information' tab is active. The user details entered are: First Name - Sanjay, Last Name - P, Alias - sp, Email - 2k20cse171@kiot.ac.in, Username - 2k22cse171@kiot.ac.in, Nickname - User1696315620912300622, Title - (empty), Company - (empty), Department - (empty), Division - (empty). The 'Role' dropdown is set to '<None Specified>'. The 'User License' dropdown is set to 'Salesforce Platform'. The 'Profile' dropdown is set to 'Bmanager'. The 'Active' checkbox is checked. Other checkboxes for Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, and WDC User are all unchecked. The 'Data.com User Type' dropdown is set to '-None--'. The 'Data.com Monthly Activity Limit' dropdown is set to 'Default Limit (300)'. The 'Accessibility Mode (Classic Only)' checkbox is unchecked. The 'High-Contrast Palette on Charts' checkbox is unchecked. The 'Load Lightning Pages While' dropdown is set to 'F2'. At the bottom right of the form, there are 'Save', 'Save & New', and 'Cancel' buttons. A note at the top right says 'I = Required Information'.

#### Step 3: Assign Records Ownership

The screenshot shows the Salesforce Setup interface. The navigation sidebar is identical to the previous screenshot, with the 'Users' option under Administration selected. The main content area is titled 'Permission Sets' and shows the 'Create' form for a new permission set. The 'Enter permission set information' tab is active. The fields filled are: Label - permission, API Name - permission, and Description - (empty). The 'Session Activation Required' checkbox is unchecked. Below this, a section titled 'Select the type of users who will use this permission set' contains the following text: 'Who will use this permission set?'. It includes three bullet points: '-Choose -None-' if you plan to assign this permission set to multiple users with different user and permission set licenses.; '-Choose a specific user license if you want users with only one license type to use this permission set.'; and '-Choose a specific permission set license if you want this permission set license auto-assigned with the permission set.' Below this, a note says 'Not sure what a permission set license is? Learn more here.' The 'License' dropdown is set to '-None--'. At the bottom right of the form, there are 'Save' and 'Cancel' buttons. A note at the top right says 'I = Required Information'.

The screenshot shows the Salesforce Setup interface with the following details:

- Left Sidebar:** Shows navigation categories like Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, ADMINISTRATION (with sub-options like Users, Permission Set Groups, and Permission Sets), and PLATFORM TOOLS.
- Current Page:** The main content area is titled "Permission Sets" under "SETUP". It displays the "Object Settings" for the "permission" object.
- Object Settings Table:**

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Optimizer, Administration (Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, Users), Data, Email, and Platform Tools (Subscription Management, Apps, Feature Settings, Slack, MuleSoft, Einstein). The main content area is titled 'Clone Profile' and displays a form to clone an existing profile. It shows 'Standard Platform User' selected as the 'Existing Profile', 'Salesforce Platform' as the 'User License', and 'Manager' as the 'Profile Name'. A note at the top says 'You must select an existing profile to clone from.' Buttons for 'Save' and 'Cancel' are at the bottom.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and Administration (Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings). The main content area is titled 'Profile chan' and displays the 'Profile Detail' for the 'chan' profile. It shows the profile name is 'chan', user license is 'Salesforce Platform', and it is a 'Custom Profile'. The 'Profile Detail' section also shows the creation date and time ('Chandru S. 03/10/2023, 1:50 pm') and modification date and time ('Chandru S. 03/10/2023, 1:50 pm'). The 'Page Layouts' section lists various standard object layouts assigned to the profile, such as Global Layout for Email Application, Home Page Default for Home Page Layout, Account Layout for Account, Alternative Payment Method Layout for Alternative Payment Method, Appointment Invitation Layout for Appointment Invitation, and Asset Layout for Asset. Each layout entry includes a 'View Assignment' link.

The screenshot shows the Salesforce Lightning Experience interface. The left sidebar is titled 'ADMINISTRATION' and includes sections for 'Users' (selected), 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', 'Queues', 'Roles', 'User Management Settings', and 'Data', 'Email', 'Platform Tools', 'Subscription Management', 'Apps', 'Feature Settings', 'Slack', 'MuleSoft', and 'Einstein'. The main content area is titled 'SETUP Users All Users'. It displays a table of users with columns for Action, Full Name, Alias, Username, Role, Active, and Profile. The table lists several users, including 'A\_Sunil' (Role: Manager, Active: checked), 'Chatter Expert' (Role: Chatter Free User, Active: checked), 'P\_Sanjay' (Role: Bmanager, Active: checked), 'S\_Chandru' (Role: System Administrator, Active: checked), 'User\_Integration' (Role: Analytics Cloud Integration User, Active: checked), and 'User\_Security' (Role: Analytics Cloud Security User, Active: checked). Buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users' are at the top of the table.

The screenshot shows the Salesforce Setup interface. The left sidebar is identical to the one in the first screenshot. The main content area is titled 'SETUP Users New User'. It shows a 'User Edit' form with tabs for 'General Information', 'Advanced', and 'Profile'. Under 'General Information', fields include First Name (Sunil), Last Name (A), Alias (sa), Email (2k20cse176@kiot.ac.in), Username (2k20cse176@kiot.ac.in), Nickname (User1696321490080232961), Title, Company (Male), Department, and Division. Under 'Advanced', there are checkboxes for Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, WDC User, and Data.com User Type (None). There are also dropdowns for User License (Salesforce Platform) and Profile (chan). Under 'Profile', there are checkboxes for Accessibility Mode (Classic Only), High-Contrast Palette on Charts, and Load Lightning Pages While.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. The main content area displays the 'User Detail' page for a user named 'Sunil A'. The page includes fields for Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Address, Time Zone, Locale, Language, Delegated Approver, Manager, Receive Approval Request Emails, and Preference ID. It also lists various roles and user licenses. A 'Help for this Page' link is located in the top right corner.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. The main content area displays the 'User Edit' page for a user named 'Sunil A'. The page includes fields for First Name, Last Name, Alias, Email, Username, Nickname, Title, Company, Department, Division, Role, User License, Profile, Active status, Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, WDC User, Mobile Push Registrations, Data.com User Type, Accessibility Mode, Debug Mode, and High-Contrast Palette on Charts. A 'Help for this Page' link is located in the top right corner.

## Step 2: Assign the Permission Set to the User Needing Delete Access

1. In the "Permission Set Detail" page, click on "Manage Assignments."
2. Click "Add Assignments" and select the user who needs delete access.
3. Save the assignment.

The screenshot shows the Salesforce Setup interface. The left sidebar is titled "Setup" and includes sections for Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and ADMINISTRATION. Under ADMINISTRATION, there are sub-sections for Permission Set Groups, Permission Sets (which is selected), Profiles, Public Groups, Queues, Roles, and User Management Settings. The main content area is titled "Permission Sets" and shows a "Permission Set Overview" for "permission01". The "Edit Properties" dialog is open, showing fields for Label (set to "permission01"), API Name (set to "permission01"), Description (empty), Session Activation Required (unchecked), and Activation Required (unchecked). Below the properties, there are sections for "App Permissions", "Apex Class Access", "Visualforce Page Access", and "External Data Source Access".

The screenshot shows the Salesforce Setup interface, identical to the one above but with a different focus. The left sidebar is the same, showing the "Permission Sets" section is selected. The main content area is titled "Permission Sets" and shows the "Permission Set Overview" for "permission01". The "Object Settings" tab is selected, and the "Accounts" tab is active. Under "Object Permissions", there is a table for "Accounts" with columns for "Permission Name" (Read, Create, Edit, Delete, View All, Modify All) and "Enabled" status. Under "Field Permissions", there is a table for "Account" with columns for "Field Name" (Account Name, Account Number, Account Owner, Account Site, Account Source, Active, Annual Revenue) and "Read Access" and "Edit Access" checkboxes.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' page open. The left sidebar is collapsed, and the main content area displays the 'permission01' permission set. The 'Accounts' tab is selected under 'Object Permissions'. The 'Object Permissions' table shows the following permissions:

Permission Name	Enabled
Read	<input checked="" type="checkbox"/>
Create	<input checked="" type="checkbox"/>
Edit	<input checked="" type="checkbox"/>
Delete	<input checked="" type="checkbox"/>
View All	<input type="checkbox"/>
Modify All	<input type="checkbox"/>

Below this, the 'Field Permissions' section is visible, showing permissions for various account fields.

The screenshot shows the Salesforce Setup interface with the 'All Users' page open. The left sidebar is collapsed, and the main content area displays a list of users. Two users are selected: 'Sunil A' and 'Sunil A'. The user list includes the following entries:

Full Name	Role	Ac...	Profile
Chandru S	CS	au611220104303@naanmudhalvan.com	System Administrator
Chatter Expert	Chatter	chatty.00d5j00000cismqean.eodfzikibsf@chatter.salesforce.com	Chatter Free User
Integration User	integ	integration@00d5j00000cismqean.com	Analytics Cloud Integration User
Sanjay P	sp	2k22cse171@kiot.ac.in	Bmanager
Security User	sec	insightssecurity@00d5j00000cismqean.com	Analytics Cloud Security User
Sunil A	sa	2k21cse176@kiot.ac.in	chan
Sunil A	sa	2k23cse176@kiot.ac.in	chan

At the bottom of the list, there are 'Cancel' and 'Next' buttons.

The screenshot shows the Salesforce Setup interface. On the left, the navigation bar includes 'Setup' (selected), 'Home', and 'Object Manager'. The main content area is titled 'Selected Users' and displays a table of users assigned to a permission set. The table columns are: Full Name, Role, Profile, Active, User License, and Expires On. Two users, both named 'Sunil A' and assigned to the 'chan' profile, are listed. Both have 'Active' checked, 'Salesforce Platform' as the User License, and 'Never Expires' as the Expires On date. Above the table, there are two radio button options: 'No expiration date' (selected) and 'Specify the expiration date' (with sub-options for 1 Day, 1 Week, 30 Days, 60 Days, and Custom Date). A 'Time Zone' dropdown is also present. At the bottom right of the content area are 'Back' and 'Assign' buttons.

The screenshot shows the Salesforce Setup interface after the assignment. The main content area has a green header bar indicating '2 assignments were successful.' Below it, a section titled 'Assignment Summary' displays a table of the assigned users. The table columns are: Full Name, User License, Expires On, Time Zone, and Status. Two users, 'Sunil A' and 'sunil A', are listed under 'User License: Salesforce Platform'. Both have 'Expires On: Never Expires' and 'Time Zone: Select a time zone...' (dropdown open). The 'Status' column shows two green checkmarks with the word 'Success'. At the bottom right of the content area is a 'Done' button.

**4.Create a screen flow for a basic survey to fill in the details for any form.**

## Step 1: Create a custom object

1. Click Setup.
2. In the Object Manager, click Create | Custom Object.
3. Now create a custom object Survey Result and fields as shown in the screenshot below:
4. Click Save.

The screenshot shows the Salesforce Object Manager interface. At the top, it says "SETUP > OBJECT MANAGER" and the object name is "Survey Result". Below the header, there's a "Fields & Relationships" section. On the left, a sidebar lists various object types: Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, Search Layouts for Salesforce Classic, Triggers, and Validation Rules. The main area displays the "Fields & Relationships" table with the following data:

Fields & Relationships		FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Page Layouts		Comment	Comment__c	Text Area(255)		
Lightning Record Pages		Created By	CreatedById	Lookup(User)		
Buttons, Links, and Actions		Email	Email__c	Email		
Compact Layouts		Last Modified By	LastModifiedById	Lookup(User)		
Field Sets		Name	Name__c	Text(51)		
Object Limits		Owner	OwnerId	Lookup(User,Group)	✓	
Record Types		Rating	Rating__c	Picklist		
Related Lookup Filters		Survey Result Name	Name	Auto Number	✓	
Search Layouts						
Search Layouts for Salesforce Classic						
Triggers						
Validation Rules						

## Step 2: Create a Thank You For Survey Lightning Email Template

1. Click App Launcher.
2. In the Quick Find box, type Email Templates.
3. Clicks on the New Email template button.
4. Name the Lightning Email Template and make sure to store it in the Public Email Templates folder.
5. Create a template like the following screenshot

Email Template  
Thank You Email - Survey

**Details** Related

**Information**

Email Template Name Thank You Email - Survey	Related Entity Type Survey Result
Description	Folder Public Email Templates
Made in Email Template Builder <input checked="" type="checkbox"/>	

**Message Content**

Subject Thank You For Completing Our Survey!	Enhanced Letterhead
HTML Value	<p>Hi {{Survey_Result__c.Name__c}},</p> <p>Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.</p> <p>Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.</p> <p>Thanks, Automation Champion</p>

### Step 3: Create an Email Alert

1. Click Setup.
2. In the Quick Find box, type Email Alerts.
3. Select Email Alerts, click on the New Email Alert button.
4. Name the Email Alert and click the Tab button. The Unique Name will populate.
5. For Object select Survey Result.
6. For the Email Template chooses Lightning Email Template Thank You Email - Survey.
7. For Recipient Type select Email Field: Email.

## 8.Click Save.

Survey - Thank You Email

Description: Survey - Thank You Email

Unique Name: Survey\_Thank\_You\_Email

Object: Survey Result

Email Template: Thank You Email - Survey

Protected Component:

Recipient Type: Search: User for:

Recipients:

Available Recipients	Selected Recipients
User: Integration User User: Rakesh Gupta User: Security User	Email Field: Email

Add  Remove

You can enter up to five (5) email addresses to be notified.

Additional Emails

From Email Address: Current User's email address

Make this address the default From email address for this object's email alerts.

Save  Save & New  Cancel

## Step 4.1: Salesforce Flow - Create a Screen that Allow Users to Fill Survey

- 1.Click Setup.
- 2.In the Quick Find box, type Flows.
- 3.Select Flows then click on the New Flow.
- 4.Select the Screen Flow option and click on Next and configure the flow as follows:
- 5.How do you want to start building: Freeform
- 6.We will use the Screen element to capture a Survey response form. Drag and drop a Screen element onto the canvas.

## **Step 4.2: Salesforce Flow - Add a Record Creates Element to Save Survey Response**

- 1.Drag-and-drop the Create Records element onto the Flow designer.
- 2.Enter a name in the Label (Save Response) field; the API Name will auto-populate.
- 3.For How Many Records to Create - select One.
- 4.For How to Set the Record Fields - select Use separate resources, and literal values.
- 5.Select the Survey\_Result\_\_c object from the dropdown list.
- 6.Set Field Values for the Survey Result

Row 1:

Field: Comment\_\_c

Value: {!Comment}

Click Add Row

Row 2:

Field: Email\_\_c

Value: {!Email.value}

Click Add Row

Row3:

Field: Name\_\_c

Value: {!Name.firstName} {!Name.lastName}

Click Add Row

Row 3:

Field: Rating\_\_c

Value: {!Rating}

7.Click Done.

**Edit Create Records**

Create Salesforce records using values from the flow.

<b>*Label</b> <input type="text" value="Save Response"/>	<b>*API Name</b> <input type="text" value="Save_Response"/>
<b>Description</b> <input type="text"/>	
<b>How Many Records to Create</b> <input checked="" type="radio"/> One <input type="radio"/> Multiple	
<b>How to Set the Record Fields</b> <input type="radio"/> Use all values from a record <input checked="" type="radio"/> Use separate resources, and literal values	
<b>Create a Record of This Object</b>	
<b>*Object</b> <input type="text" value="Survey Result"/>	
<b>Set Field Values for the Survey Result</b>	
<b>Field</b> <input type="text" value="Comment__c"/>	<b>Value</b> <input type="text" value="A_a Comment X"/>
<b>Field</b> <input type="text" value="Email__c"/>	<b>Value</b> <input type="text" value="A_a Email &gt; Value X"/>
<b>Field</b> <input type="text" value="Name__c"/>	<b>Value</b> <input type="text" value="={!Name.firstName} {!Name.lastName}"/>
<b>Field</b> <input type="text" value="Rating__c"/>	<b>Value</b> <input type="text" value="A_a Rating X"/>
<input type="button" value="+ Add Field"/>	
<input type="checkbox"/> Manually assign variables	
<input type="button" value="Cancel"/> <input type="button" value="Done"/>	

### Step 4.3: Salesforce Flow - Call an Action - Email Alert to Send Out Thank You Email

- 1.Under Toolbox, select Element.
- 2.Drag-and-drop Action element onto the Flow designer.
- 3.In the Action box, type Survey - Thank You Email.

4.Clicks on the Survey - Thank You Email email alert.

5.Click Done.

Edit "Survey - Thank You Email" email alert

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

* Label	* API Name
Send Thank You Email	Send_Thank_You_Email
Description	
<input type="text"/>	

Set Input Values

A <sub>a</sub> * Record ID	{!Save_Response}
----------------------------	------------------

Save as

<a href="#">A New Version</a>	<a href="#">A New Flow</a>			
<p><b>* Flow Label</b> <input type="text" value="Survey"/></p> <p><b>* Flow API Name</b> <input type="text" value="Survey"/></p> <p><b>Description</b> <input type="text"/></p> <p><a href="#">Hide Advanced</a></p> <p><b>How to Run the Flow</b> <input type="text" value="User or System Context—Depends on How Flow is Launched"/></p> <p><b>* Type</b> <input type="text" value="Screen Flow"/></p> <p><b>* API Version for Running the Flow</b> <input type="text" value="51"/></p> <p><b>Interview Label</b> <input type="text" value="Survey {!\$Flow.CurrentDateTime}"/></p> <p><b>Last Modified</b> 12/21/2020, 4:54 PM by Rakesh Gupta</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 33%; padding: 5px;">Status: <a href="#">Active</a></td> <td style="width: 33%; padding: 5px;">Type: Screen Flow</td> <td style="width: 33%; padding: 5px;">Version Number: 2</td> </tr> </table>		Status: <a href="#">Active</a>	Type: Screen Flow	Version Number: 2
Status: <a href="#">Active</a>	Type: Screen Flow	Version Number: 2		
<a href="#">Cancel</a> <a href="#">Save</a>				

## Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the lightning:flow component.

- 1.Click Setup | Developer Console
- 2.Navigate to File | New | Lightning Application
- 3.Enter a Name (VFPageToLC) field, make sure to select the Lightning Out Dependency App checkbox.
- 4.Click Submit.
- 5.Copy code from GitHub and paste it into your Lightning Application.
- 6.Save your code.

File ▾ Edit ▾ Debug ▾ Test ▾ Workspace ▾ Help ▾ < >

VFPageToLC.app \*

```
1 ▾ <aura:application access="global"
2           extends="ltng:outApp"
3           implements="ltng:allowGuestAccess">
4       <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

Logs, Tests, and Problems

```

<apex:page showheader="false" lightningStylesheets="true">
<html>
<head>
<apex:includeLightning />
<!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
<div id="flowContainer" />
<script>
var statusChange = function (event) {
    if(event.getParam("status") === "FINISHED") {
        var outputVariables = event.getParam("outputVariables");
        var key;
        for(key in outputVariables) {
            if(outputVariables[key].name === "myOutput") {
                // Do something with myOutput
            }
        }
    }
};
$Lightning.use("c:VFPageToLC", function() {
    $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
        "flowContainer",
        function (component) {
            component.startFlow("Survey", );
        }
    );
});
</script>
</body>

```

## Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

- 1.Click Setup.
- 2.In the Quick Find box, type Sites.
- 3.Clicks on the New button.
- 4.Fill the details as per the screenshot below:
- 5.Click Save.

Row 1:

Field: Comment\_\_c

Value: {!Comment}

Click Add Row

Row 2:

Field: Email\_\_c

Value: {!Email.value}

Click Add Row

Row 3:

Field: Name\_\_c

Value: {!Name.firstName} {!Name.lastName}

Click Add Row

Row 3:

Field: Rating\_\_c

Value: {!Rating}

Click Done.

### Proof of Concept

Now onward, if someone opens the site url and fills the form:

The form is titled "Survey". It contains the following fields:

- Name
- First Name: Alok
- Last Name: Sinfal
- \*Email: (Redacted)
- \*Rating: 5 (with a red minus sign icon)
- \*Comment: Awesome Blog

A "Next" button is located at the bottom right of the form area.

After successful submission, he/she will receive an email.
